Paper Christmas Wreath

Printable shapes for a kids' holiday craft

Choose your paper size

For US Letter, print pages 2 and 3. For A4, print pages 4 and 5.
Select portrait orientation and Actual Size or 100% in the print dialog.
Measure the line below on paper. It should be exactly 1 inch (25.4 mm).

1 inch / 25.4 mm

Coloring sheet

Color the small shapes while they are still on the page. The plain cane has alternating bands for practicing the stripes. Cut around the outside of each motif you want to use. Keep the star attached to its tree.

Accent sheet

Four larger motifs are ready to cut: a reindeer, a gingerbread figure in a Santa hat, a snowman in a top hat and a striped cane with a paper bow. Use this cane to match the finished wreath, or choose the plain cane you colored.

On the wreath

Start with a paper ring that already has a bow and a hanging cord. Place the gingerbread beside the ribbon, then glue a tree beside it. Keep the open middle clear. The finished wreath uses ten paper pieces, including two matching firs.
